Revenue File No. 91 of 1934

Serial No. 2

Letter No. 7840 dated 16-4-1935 from the Chief Engineer forwarding a consolidated estimate amounting to Rs 41,715 for water supply to extensions round about the Central Jail Extension, Bangalore city and requesting that the Govt share of the total cost viz Rs 11,060 be met from the grant under '30 Grants for Public Impts'

The estimate consists of four parts of which the Chief Engineer recommends that Govt meet 1/4th of the cost of laying trunk main 10 to 9" from 12" High Level Reservoir viz Rs 24,000 and the whole cost of Rs 5960 for laying distribution system to Gandhinagar. He however reported that the Municipal Council request that Govt should bear half the cost of laying the mains from the High Level Reservoir the details are explained in ~~detail~~ full by the Chief Engineer. The Chief Engineer recommends that the Govt cost be fixed at Rs 11,060 and met from '30 Grants for Public Impts' The Financial Secretary may be consulted

FINANCIAL SECRETARY Dept. No. Fl. 2350 11 APR 1935 Secrets—Confn Secst LORD

4 Recently certain sites in the Gandhinagar extension were I believe sold by the Municipality It may be ascertained and intimated whether the sale proceeds of these sites were credited to Government or to the Municipality

5 It is stated that the Government share will have to be met out of the provision under 30 Grants for public improvements Whether there is sufficient provision for the purpose is not clear

6 The cost of such minor capital works within the Municipal limits is I think a legitimate charge to the Municipal funds if the water tax and excess water charges recovered from the owners of houses in this and other areas are credited to the Municipality

2 The sale proceeds of the sites in the Gan Nagaf extension have been credited to Governme as already intimated in paras 4 and 5 of this office letter Dated 16-4-1935

3 When an extension is laid by Government a the sale proceeds of the sites have been credi to them it would appear to be necessary that Government should meet the cost of laying roads water supply etc The basis on which the distribution of cost should be made between Gov ment and the Municipality has been clearly explained in this office letter of 16-4-1935 to the Chief Secretary

Returned with Compliments -

The total value of the sites in the Old Jail Extension, which was formed in 1928 and which is now called "Gandhi Nagar" is R 2,09,034-8-0 and against this, a sum of R 1,99,809-8-3 has so far been recovered and credited to Government under "XIII Miscellaneous - Sales of land "

The value of the sites in the New Jail Extension, sold recently, goes to the Municipality and has not therefore been credited to Government

A S Ghanekar
COMPTROLLER
21/6/35

15) I am still of opinion that the cost of all the four works referred to in the file is to be borne by the Municipality for reasons explained by the Executive Engineer Water Supply Division The Municipality which collects the water tax and excess water charges in respect of the buildings in these localities should meet the initial cost of the

JK 2702

EXECUTIVE ENGINEERS OFFICE 25 JUNE 35 WAD I

FINA 25 JUN

water supply The main reason for requiring Government to meet a share of the cost is that the sale proceeds of the old jail (Gandhinagar) extension were credited to Government This may be a justification for meeting a portion of the cost of the second work, viz laying distribution system to Gandhinagar at a cost of Rs 5 060 and there do not appear to be sufficient grounds for meeting any portion of the first work, viz laying trunk main from High level reservoir

16 The P W Secretary suggests that the cost of the first work may be borne by Government and the Municipality on the basis of population in the Gandhinagar and New Jail Extension On this basis, the Government share will be Rs 5 769 (24,000 X 2 500/10,400) for the first work and the total cost including that of 2nd work will be 10 829/- The population of the new extension is likely to increase and the revenue of the Municipality towards water tax and excess water charges will increase year after year The proportion of the cost of laying out the main to be borne by Government should therefore be much less than one-fourth of the cost suggested by the P,W Secretary or Rs 5769 worked out on the basis of the present population If any portion of the scheme costing Rs 41 715 is necessari to be borne by Government, I would state that it should not exceed s 10,000 the cost being met out of the provision under "30 Grants for Public Improvements" by reappropriation Before sanctioning the scheme it should be ascertained from the Municipality whether it

The Chief Secretary to Govt of Mysore,
Bangalore

SIR

Subject - Water Supply to Extensions round about the Central Jail at Bangalore

---oOo---

I have the honor to forward herewith copy of letter No 896 dated 6-3-1935, received from the Executive Engineer, Water Supply Division, together with a consolidated estimate amounting to Rs 41,715/- for the above work The estimate has been prepared in 4 parts as noted below -

	Rs
1) Laying trunk main 10" to 9" from 12" High Level Reservoir	24,000/
2) Laying distribution system to Gandhinagar	5,060/-
3) Laying distribution system to the New Jail Extension	9,540/-
4) Laying distribution system to Ramakrishnapur	3,115/-
Total	Rs 41,715

2 The report accompanying the estimate explains the provision made therein The Municipal Council have agreed in their letter No A1 4949/34-35 dated 1-3-1935 to the proposals made but, on condition that Government should bear the cost of the work amounting to Rs 5,060/- for laying the distribution system to Gandhinagar (Item No 2) and a moiety of the cost of the work amounting to Rs 24,000 for laying the main (item No 1 They also state that funds for the two estimates amounting to Rs 9,540 & 3,115 (Item Nos 3 & 4) will be given by them if

Government agree to bear the cost of the first two works as proposed above

3 The Executive Engineer says that the whole scheme not only benefits the distribution in a locality which at present suffers for want of a main of adequate capacity but also brings in additional revenue to the Municipality from the excess water charges He therefore recommends that the full cost of the scheme should be borne by the Municipality

4 A sum of Rs 1,96,796/- nearly is said to have been realised from the sale of sites in the Jail Extension and an expenditure of Rs 43,966/- has been incurred on the work of laying out the Central Jail Extension

5 Whatever justification there may be for Government to bear the cost of distribution in Gandhinagar as the proceeds of the sale of sites have been credited to Government, there appears to be no reason why a moiety of the cost of the main costing Rs 24,000/- should be met by Government The main in question benefits the Cubbonpet and Martha's Hospital mains which are experiencing paucity of supplies now If Gandhinagar extension alone should be served, there would not have been a necessity for such large mains as 10" & 9" ones

6 Assuming however that a sharing of cost of this trunk main of 10" to 9" size on the population basis in the areas served would be on equitable basis, the following figures for population are furnished to arrive at the proportion of cost to be borne by Government and the Municipality

	Rs
Government	
1) Gandhi Nagar extension	1,000
2) Public Office etc , to east of Kantharaj Circle	1,500
Total Rs	2,500

CI

II MUNICIPAL

	Rs
(1) New Jail and Ramakrishnapur Extension	2,000
(2) District Office & St Martha's Hospital sub-mains	1,400
(3) Kempe Gowda Road sub-main	600
(4) Hospital lane sub-main	900
(5) Cubbonpet lane sub-main behind London Mission school up to Cenatoph	3,000
Total	Rs 7,900

On this basis, the proportion of Government to Municipal will be as 1 3 and it appears to be fair to divide the cost at Rs 24,000 in the proportion of Rs 6,00 to Rs 18,000

If this proposal is accepted, the Government sha of the total cost will be Rs 11,060/- and the Municipal Rs 30,655/-

The Government share will have to be met under Grants for Public Improvements'

I have the honor to be,
Sir,

Chief Engineer of Mysore

MCP

Letter No 596/5 dated 6th March 1935 from the Executive Engineer, Water Supply Division, Bangalore, to the Chief Engineer of Mysore, Bangalore

---- -----

Re: Consolodated estimate for water supply to Extensions round about the Jail for Rs 41,715/-

---

In continuation of this office Memo No 508 dated 2nd February 1935, regarding the above, I have the honor to state that the estimates amounting to Rs 41,715 for laying a 10"-9" main from 12" main of High Level Reservoir for water supply to Jail and other extensions nearby, have been returned with the Municipal Commissioner's letter No A1-4989/34-35 dated 1st March 1935, stating that the Municipal Council are agreeable to the above proposals provided the Government agree to bear the cost of the work amounting to Rs 5,060/- for laying the distribution system to Gandhi Nagar (Jail Extension) and the moiety of the cost of work amounting to Rs 24,000 for laying the 9" and 10" main from the 12" High Level Reservoir Main A copy of his letter is herewith enclosed for your kind perusal The other two estimates for Rs 9,540/- and Rs 3,115 are returned countersigned by them

In this connection, I would like to observe, that this project is mainly for improving local distribution system and for laying new distribution system in the extensions formed by the Municipality round about the Jail and all these areas are within the Municipality As such, it is the duty of the Municipality and not the Government to bear the cost of such a scheme Besides it is the Municipality who will derive extra revenue in the shape of excess water charges from the houses in these extensions If the Government is going to bear a portion of the cost, is the Municipality going to allow the Government to tak

portion of the revenue proportionate to the amount invested by them in the scheme?

The reason why the Municipality wants the Government to bear some cost of this scheme, seems to be that a portion of the area, formerly called the Jail Extension but now called Gandhi Nagar was formed by the Government out of the grounds of the Jail and the sale proceeds of the sites went to the Government and after laying out the extension with roads etc the extension was handed over to the Municipality No doubt, the sale proceeds of the site went to the Government but the house and other taxes that will be levied on the buildings th are coming up on these sites will go to the Municipality perpetually

Besides this is a very small extension, the distributio system of which costs only Rs 5,060/- against Rs 9,540/- for New Jail Extension formed recently by the Municipality and Rs 3,115/-, for Ramakrishnapuram Extension nearby i e , in all Rs 12,655/- Again if the Government has to supply water to Gandhi Nagar, the extension formed by the Government, it would require a very small main about 3" to 4" diameter to supply this extension only But the main proposed is a 10" & 9" main to feed not only this extension but the new Jail Extension and Ramakrishnapuram and a large area of the City rpund about Cottonpet, Bank of Mysore and Mission School which form a high level zone and do not receive water with adequate pressure from the small existing main from the Low Level Reservoir It will thus be seen that the whole scheme greatly benefits the local distribution of a locality which at present suffers much for want of an adequate main - not only this but all the additional revenue from excess water charges will go t the Municipality

der

Under the above circumstances, I feel, that it is but reasonable that the Municipality bears the full cost of the scheme

---
